Reviews

This pdf can be well worth a read, and much better than other. I am quite late in start reading this one, but better then never. Your daily life span will probably be transform when you full looking over this book.

(Roxanne Stehr)

A TREATISE ON INDUSTRIAL PHOTOMETRY WITH SPECIAL APPLICATION TO ELECTRIC (CLASSIC REPRINT)

Forgotten Books, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Treatise on Industrial Photometry With Special Application to Electric Dr. Palaz s Traite de Photometrie Industrielle Specialement Appliquee a L Eclairage Electrique was published in Paris in 1892. It is in great part a compilation of facts and experiments by the best authorities, and contains valuable data for the student in electricity and for those specially interested in the subject of electric lighting. No work to be compared with it has, as far as we know, appeared up to this time, and the great need of such a work, both in colleges and technical schools as a text-book and in the interests of electric lighting in general, seems to warrant its translation into English. In some cases, where different methods, employed at the University of Michigan, could also be used with advantage, the translators have noted the fact by references to the Appendix, which further contains some additional information on the general subject. Besides this work, Professor Palaz is the author of a work on Industrial Electricity (Cours d Electricite Industrielle), being a series of lectures given to the engineers of the Jura-Simplon Railway Company in 1892. Adrien Palaz was born July 20, 1863, at Riex, in French Switzerland. After studying in the gymnasia of Burgdorf and Lausanne, he entered, in 1880, the Federal Polytechnic School, where he paid particular attention to mathematics, mechanics, and physics.
