A mere inspection of the ahove two series--in pedal of the inverse C, of the primitive curve C; or what is equivalent, the (--n+ l)th pedal of the reciprocal C of the primitive. 2. Writing J for the operation of inversion, R for that of reciprocation, and P for that of taking the pedal, we have, hy definitions and the first part of art. 1, J2 = R = 1, P = JR; JP = J2R.= E, RJP = K2 = 1, RJ = P-, . 3. These, then, are the laws of comhination of the symhols R, J, P. We can now immediately prove the theorems in the question. For 4. Again; any formula may he transformed hy interchanging R and J, and reversing the signs of all indices of P. To derive in this way the second pair of theorems from the first, we shall have to make a further change from n to--n. The formula; (3) and (4) are immediately convertihle. 5.
